

I wish to protest any infringement of XM Satellite Radio broadcasts concerning local WX and/or traffic information... as an Over the Road truck driver delivering goods throughout the nation... Having a good radio reception and timely information is very important...

In the past, it was sometimes difficult to get timely information on the radio from a semi-truck... with XM radio is now possible to select the appropriate channel for the area you are traveling through... or when the WX appears to be threatening a tornado or other severe storms...

XM is the best thing to happen in years for the Over the Road truckers that deliver the freight daily in our great nation where many of us have served to protect Free Speech rights... Free Access to the airways too....

Sincerely, Don Link
